curriculum vitae

design
sustainable • product • graphic • web

Graduated in 2005 with a first class honours in Product Design: Sustainable Futures, I am an enthusiastic, forward thinking designer with two years professional experience working alongside Thinkable Studios and Motorola - taking countless designs from concept sketch, to working prototype, and more recently to final product.

I have strong 3D CAD and sketching skills - trained and proficient in Solidworks, with over three years of experience using Alias Studio, modelling complex, accurate, ergonomically sound surfaces.

And with so much of a product's success relying on its close ties with marketing, I have always strived to maintain cutting-edge presentation skills, utilising photo-realistic rendering, animation, film, and rich media based web design. This enables me to be a true jack of all trades if needed, and also to work efficiently within a multi-disciplinary design team.

education:

Degree course: 2002-2005	Surrey Institute of Art and Design Product Design: Sustainable Futures 1st class BA(Hons) Designs exhibited at New Designers, Islington, 2005
